#### **DETAILED ACTION**

# Suggestion

1. Although acceptable, claims depending multiple claims in the alternate. The examiner suggests amending dependent claims to depend on 1 claim rather than depending on multiple claims. Including multiple claims can be confusing. Dependent claims depending on 1 claim provides a concise breakdown of the invention.

# Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 3. Claim1 is rejected under 35 U.S.C. 102(e) as being anticipated by Kato et al (6,452,628).

Regarding claim 1,

Recognizing a motion field of the entire view associated to the self-motion and segregating an area incoherent with said motion field and local area image process

Art Unit: 2624

(note col. 12 lines 59-60, motion detector recognizes motion of the entire view of local area)

Calculating local flow information in the visual image in parallel (note col. 12 lines 63-64, processing method used in local flow of the image)

Wherein the apparatus results of both processes mutually to improve the accuracy of object detection (note col. 12 line 65- col. 13 line 3, detecting moving objects

# Allowable Subject Matter

- 4. Claims 3-15 allowed.
- 5. The following is an examiner's statement of reasons for allowance for independent claims 3, 5, 6, 9, 10, 12 and 13. The distinguishing feature is including both local and global flow in local area and global area, as well as calculation inertia and figure ground segregation in detecting the absence or presence of an object. These features in combination with other features are not taught in the prior art. Claims 4, 7-8, 11 and 14-15 depend on claims 3, 5, 6, 9, 10, 12 and 13. Therefore are also allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Application/Control Number: 10/624,786

Art Unit: 2624

6. Claim 2 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

7. The following is a statement of reasons for the indication of allowable subject matter: Regarding claim 2, the distinguishing feature is including both local and global flow in local area and global area, as well as calculation inertia and figure ground segregation in detecting the absence or presence of an object. These features in combination with other features are not taught in the prior art.
